

Simplicity at the core of VASCO's new range of DIGIPASS Pack authentication solutions

OAKBROOK TERRACE, III., and ZURICH, Switzerland, May 6, 2009 – VASCO Data Security International, Inc. (Nasdaq: VDSI) (www.vasco.com), a leading software security company specializing in authentication products, launches an off-the-shelf security solution to address the needs of SMBs. With packaged solutions for authentication, VASCO responds to the growing demand of small businesses around the world to secure access to the corporate network and applications. DIGIPASS Packs will be available as of May 11th in the US, the worldwide availability will follow later this year.

The DIGIPASS[®] Pack for Remote Authentication offers a complete solution in a box. The DIGIPASS Pack is simple to install, easy to manage, and provides a level of security necessary to protect mission-critical applications. The DIGIPASS Pack contains the server software and DIGIPASS[®] GO6 authenticators in packs of 5, 10, 25, and 50.

DIGIPASS Pack for Remote Authentication comes in two different versions:

- DIGIPASS Pack for Remote Authentication Standard Edition includes support for RADIUS clients including VPN and Firewalls.
- DIGIPASS Pack for Remote Authentication Gold Edition includes support for RADIUS clients as well as web interfaces for Citrix, OWA, and other applications

The DIGIPASS Pack for Remote Authentication is a scalable solution and new users can easily be added.

“Many of the small businesses we work with have the same authentication challenges as the largest enterprises. All businesses, relevant of their size are looking to secure their mission-critical applications, ensure security and privacy compliancy rules are met, and reduce costs. The Digipass Pack was designed to address the specific concerns of small businesses and to provide a platform that is simple, secure, and scalable to support future growth, says Jan Valcke, President and COO at VASCO Data Security.
