

PRESS RELEASE : VisionWaves and Polymita partner in the international market

The partnership delivers a unique solution for complex organizations in dynamic environments to reach Business Excellence

Zeist / Barcelona, June 2009- VisionWaves, the innovative management solutions company, has expanded its international network of expert partners with the recent addition of Polymita Technologies, a world leader in BPMS recognized by Gartner in its latest Magic Quadrant. Both companies realize their vision by translating strategic goals to a tactical and operational level, so the partnership will help companies to truly align business strategy towards process execution. They both guide organizations to Business Excellence by improving strategy, people, processes and resources in their mutual context.

VisionWaves supplies the complete variety of consultancy, innovative software and training worldwide and is the specialist in strategy implementation and aims the markets Finance, Health care, Non Profit and Aviation & Defence. Polymita Technologies is the leading Business Process Management (BPM) software vendor that helps companies to improve productivity, reduce operative costs and gain control and visibility over the business activity.

The added value of this partnership is that, with the The Management Box of VisionWaves and the Business Process Management suite of Polymita, organizations realize their goals because it ensures that the executed processes are completely in line with the company strategy.

At the Gartner ITxpo 2008 the two companies met and realized that a combined solution is unique. Alfred Godeke, director/ founder of VisionWaves: "We expect that the collaboration between Polymita and VisionWaves creates a break through Management Solution that delivers fast results for complex organizations who struggle with performance." According to Erik Brievea, President of Polymita, "the partnership will help companies to truly align business strategy towards process execution, in a faster, easier and efficient way."

About VisionWaves - www.visionwaves.com

Gartner's Cool vendor VisionWaves provides management boxes, which enable organizations to create sustainable value in quickly changing markets. The box combines best practice management methodology and technology, this guarantees immediate value for money, as opposed to "classic" expensive and long-lasting implementations. VisionWaves works for organizations in the sectors aviation and defense, finance, health care and the public sector. In each of these sectors we cooperate with renowned partners who sell and deliver boxes. Founded in 2000, VisionWaves has offices in The Netherlands, UK and Chile.
