

Alors que les jeux olympiques continuent et que les médailles s'accumulent pour la France, McAfee met en garde les internautes contre les programmes malveillants qui se cachent derrière le nom de certains athlètes. Une recherche menée sur ces 3 dernières semaines révèle que :

- Le sport le plus dangereux à rechercher est le patin à glace : 6 des 10 athlètes les plus dangereux sont des patineurs.
- Les athlètes des Etats-Unis sont les plus dangereux, suivis par le Japon, la Russie, l'Italie et l'Allemagne.
- Les internautes ont une chance sur quatre d'être infectés par un programme malveillant en recherchant Jennifer Rodriguez (Etats-Unis, patinage de vitesse) ou encore Sasha Cohen (Etats-Unis, patinage artistique).
- Le sportif français le plus dangereux est Brian Joubert (patinage artistique), suivi de Sylvain Dufour (surf), Ophélie David (ski acrobatique), Isabelle Delobel (patinage artistique) et Olivier Schoenfelder (patinage artistique).

Comment se protéger?

McAfee conseille d'utiliser des outils de sécurité à jour. Dans chacune de ses suites de produits, McAfee propose la technologie SiteAdvisor qui donne une indication claire (annotation en rouge, jaune ou vert) de la fiabilité et du niveau de dangerosité d'un site web, avant même que l'internaute ne s'y rende.

Vous trouverez ci-dessous plus de détails sur le top 10 des sportifs les plus dangereux dans le monde (en anglais) :

1. **Jennifer Rodriguez** – (Speed Skating; U.S.A; Female) – This newsworthy Miami native came out of retirement to skate in her fourth Winter Olympics, making her a magnet for cybercriminals and malicious screen savers. Searching for her poses a one in four chance of being infected with a virus, spyware or adware.
2. **Sayuri Osuga** – (Long Track Speed skating; Japan; Female) – Sayuri's packs a double punch of interest for participating in both the Summer and Winter Olympics. There is a 22% chance of contracting a virus when searching for downloads of her Olympic feats.
3. **Alexander Smirnov** – (Figure Skating; Russia; Male) – Alexander was ranked first in the 2009-2010 Russian Championship, and ranked as the most dangerous figure skater to search. He poses an 18% chance of downloading a malicious file when searched.
4. **Peter Fill** – (Alpine Skating; Italy; Male) – With Alpine Skiing as the most dangerous Olympic sport physically, it's no wonder Peter lands in the top five most dangerous Olympians. He's an easy target for hackers posing a 17% chance of visiting a red or yellow risky site.
5. **Sasha Cohen** – (Figure Skating; U.S. A.; Female) – Searching for America's sweetheart figure skater will not do sweet things for your computer. If you search for Sasha Cohen downloads you have a 16% risk of being spammed later or contracting a virus.
6. **Gillian Apps** – (Ice hockey; Canada; Female) – When she's not winning medals on the ice, this hockey star poses a 15% chance of giving you spyware or a malicious download.
7. **Jack Johnson** – (Ice hockey; U.S.A.; Male) – Jack is not only all over the globe walking in the Vancouver Opening Ceremony on Friday and playing in his LA King's hockey game on Saturday, he's also all over the Web. His continental spread makes him a more vulnerable internet search for curious ice hockey fans, with a 15% chance of risk.

8. **Anni Friesinger** – (Speed skating; Germany; Female) – This speed skating Olympian doubles as a model and bona fide sex symbol in Germany. When searching for her nickname, “Super Sexy Anni,” users have a 14% chance of finding infected links.

9. **Angelina Jensen** – (Curling; Denmark; Female) – Angelina is a world curling medalist, and also a world class threat. When users search for Angelina Jensen downloads and screensavers they have a 14% chance of uncovering a dangerous file.

10. **Ben Agosto** – (Figure skating; U.S.A.; Male) – As the reigning silver medalist in his sport, Ben is used to being a hot topic of interest. Cybercriminals know this too, and users have a near 14% chance of catching a virus when searching for him.
