

Beyond mobile. And beyond all expectations.

Introducing Snapdragon™ S4 processors by Qualcomm®. From smartphones and tablets that break the boundaries of mobile, to TVs and notebooks that bring the best mobile capabilities and apps home. Snapdragon S4 processors are designed to power the most unbeatable experiences on the widest range of platforms so you can do more, and recharge less.

S4 Prime

Mobile experience, meets TV. Televisions and set-top that offer a compromise-free way to bring the best mobile experiences to the biggest screen in the house.

S4 Pro

Computing that goes the distance. Performance so powerful, it isn't only for mobile devices. Ultra-thin and sleek computing devices that take seamless experiences and boundary-breaking battery efficiency to new places.

S4 Plus

Powerful mobile experiences. Smartphones and tablets that deliver dynamic, immersive experiences and powerful, battery-friendly performance that put new possibilities in your hands.

S4 Play

Where essential mobility starts. Step up to a new level of mobility. Start posting status updates, checking email, sharing pics and video with friends, and even managing your business. Anywhere, all the time.

Proof that mobile can be more than you ever imagined.

See the difference Snapdragon S4 processors can make*.

Never take another bad shot.

Kiss shaky pics and video goodbye with next-generation image stabilization.

Game away, your way.

Use wireless display technology to play the hottest games on your TV's big screen, using your smartphone or tablet as your game controller.

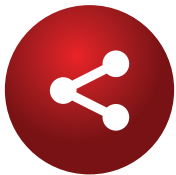

Nod if you're hands-free.

Gesture control technology lets you control apps and games with the flick of a finger, or even the blink of an eye.

Know who's not saying cheese.

Built-in processing lets you know when everyone's smiling, and even waits to snap the picture if somebody blinks or looks away from the camera.

Make more connections.

Transfer media, work in synch, or simply game away with built-in peer-to-peer technology that connects you to any enabled device within range.

Big sound, no matter how small the device.

Don't just stream your favorite movies with theater-quality audio. Also shoot your own videos in full 1080p HD with 7.1 surround sound.

Share your content just about anywhere.

Use a WiFi connection to move and display your content between your WiFi-enabled devices and screens in your house or office. No cables necessary.

Make images jump from your screen.

Bring your mobile world to life with real-time conversion of 2D video to stereoscopic 3D.

Enjoy mobile peace of mind.

Built-in security technology designed to help keep your device safe from hackers and viruses, so you can bank, shop and search the web on the go, without worry.

Old-school notes. Next-gen technology.

Motion detection technology lets you jot down reminders or sketch out an idea with a pen and paper and instantly capture the image on your device.
