

COMMUNIQUE DE PRESSE

MERCREDI 16 JANVIER 2013

Mission accomplished! TRIDELITY is the first manufacturer worldwide to present glasses-free 3D video walls in 3x3 (165") and 2x2 (110") with slim bezel. Out-Of-Home 3D advertising in huge dimensions becomes a reality. The main features of our Walls are:

Glasses-free 3D in fantastic dimensions of up to 14 feet screen-size and up to 80 square feet screen surface

Viewing distances of 50 feet or more – custom distances available.

Extremely high resolution – each screen is a Full-HD 55" model – already the 2x2 model runs on QUAD-HD resolution

Extremely slim bezel of just 0.2 inches per screen thanks to "ultra narrow bezel" technology
Both, the slim design as well as the 3D depth performance throughout the whole screen are more than convincing

Alternative models such as 7x1, 3x2 or 3x4 Walls are available upon request – Tridely's unique portrait (vertical) screen format also as Wall available

Up to 5760x3240 pixels of breath-taking glasses-free 3D

An all-round, worry-free package. TRIDELITY delivers the Walls already pre-configured with all Hardware needed for 24/7 operation

Tridely's 2x2 video wall will be on show at Tridely's booth A134 (Hall 9) at ISE Amsterdam exhibition from January 29th to January 31st.
