(3) Changes in accounting procedures

1) Related to accounting standard revisions etc. : Not applicable

2) Other changes : Applicable

[Note] Please refer to "4. Other Information" at page 4 for details.

(4) Outstanding shares (common shares)

1) Number of shares outstanding (including treasury stock)

As of June 30, 2009 : 141,669,000 shares As of Mar. 31, 2009 : 141,669,000 shares

2) Number of treasury stock

As of June 30, 2009 : 13,784,867 shares As of Mar. 31, 2009 : 13,784,279 shares

3) Average number of shares

Three months ended June 30, 2009 : 127,884,495 shares Three months ended Jun. 30, 2008 : 127,888,995 shares

[Note]

Forecasts announced by the Company referred to above were prepared based on management's assumptions with information available at this time and therefore involve known and unknown risks and uncertainties. Please note such risks and uncertainties may cause the actual results to be materially different from the forecasts (earnings forecast, dividend forecast, and other forecasts). With respect to this forecast, please refer to pages 3 for "3. Consolidated Financial Forecast."

1. Consolidated Operating Results

Nintendo continues to pursue "Gaming Population Expansion" based on the idea of putting smiles on many people's faces by offering brand new entertainment that anyone can enjoy, regardless of age, gender or gaming experience.

With respect to business operations by product category during the three months ended June 2009, within the handheld device segment of the electronic entertainment products division, "Nintendo DSi," released in Japan last fiscal year, was launched overseas in April this year. Worldwide unit sales of "Nintendo DS" hardware were 5.97 million units during this quarter and 107.75 million units life-to-date. Regarding "Nintendo DS" software sales in the first quarter, the "Pokémon Platinum Version" sold well overseas, however, there were few popular new titles. As a result, worldwide sales of "Nintendo DS" software were 29.09 million units in the first three months of this fiscal year.

In the console business, there were fewer blockbuster software titles that briskly drove hardware sales this June quarter versus the same period a year ago when titles like "Mario Kart Wii" and "Wii Fit" were launched in overseas markets. Thus, "Wii" hardware sales units were 2.23 million units in the first quarter of this fiscal year and 52.62 million units life-to-date. Regarding "Wii" software sales this three-month period, popular titles like "Wii Fit" and "Mario Kart Wii" continued to sell well in overseas markets. "Wii Sports Resort," which provides a dozen fun resort-themed sport games utilizing the "Wii MotionPlus" accessory, which can sense the subtle motion of players, had limited contribution to earnings this quarter since it was introduced at the end of June in Japan and has yet to be released overseas. Worldwide sales of "Wii" software were 31.07 million units in the first three months of this fiscal year.

In addition, due to appreciation of the yen during this quarter, first quarter net sales were 253.4 billion yen (40.1% down from the previous first quarter), operating income was 40.4 billion yen (66.1% down from last June quarter), ordinary income was 64.8 billion yen (63.4% down from the June quarter last year), and net income was 42.3 billion yen (60.6% down from the three-months period ended June 2008). First quarter net sales in the electronic entertainment products division were 252.8 billion yen, while sales in the other products division (playing cards, karuta, etc.) were 0.6 billion yen.

With regard to results by geographic segment, sales in Japan were 305.4 billion yen including inter-segment sales of 272.3 billion yen. Operating income was 72.2 billion yen. Sales in the Americas were 103.6 billion yen including inter-segment sales of 0.5 billion yen. Operating income was 0.4 billion yen. Sales in Europe were 90.6 billion yen including inter-segment sales of 1 million yen. Operating losses were 0.5 billion yen. Sales in other areas were 26.7 billion yen including inter-segment sales of 68 million yen. Operating income was 2 billion yen.

2. Consolidated Financial Position

As of June 30, 2009, total assets decreased by 174.9 billion yen compared to the previous fiscal year-end to 1,635.8 billion yen, mostly due to the payment of dividends and income taxes. Total liabilities decreased by 119.7 billion yen compared to the previous fiscal year-end to 437.1 billion yen, primarily due to the decrease of notes and accounts payable-trade and the decrease of income taxes payable.

Cash and cash equivalents decreased by 117.5 billion yen compared to the beginning balance of this fiscal year to 776.6 billion yen.

3. Consolidated Financial Forecast

Consolidated earnings forecasts for the fiscal year ending March 31, 2010 are unchanged from the forecasts in the report of "Consolidated Financial Statements" released on May 7, 2009.

4. Other Information

(Application of simplified method for accounting procedures)

(Calculation of corporate income taxes etc.) In computing corporate income taxes, only major items are taken into account in terms of additions and deductions for the income and tax credits.

(Calculation of income taxes) With respect to certain consolidated subsidiaries, corporate income tax amount is calculated by taking the amount of income before income taxes through the three-month period ended June 2009 multiplied by reasonably estimated annual effective tax rate with the effects of deferred taxes reflected.

(Changes in accounting procedures)

(Change in valuation method of investment securities) Unrealized gains or losses on other securities with marketable value had been accounted for using the partial net asset recording method. Effective from the first quarter ended June 2009, in order to improve comparability with other companies, the accounting method has been changed to the whole net asset recording method. The impact, on ordinary income and income before income taxes and minority interests in income, is minor.

5. Consolidated Quarterly Balance Sheets

8. Segment Information

A. Segment Information by Business Categories

Considering similarities of categories, characteristics, manufacturing method, or sales market of what Nintendo deals in, the electronic entertainment product segment accounts for over 90% of total sales and operating income of all business categories, with no other categories to be reported on the basis of disclosure rules. Therefore, this information is not applicable to Nintendo's business.
