**Globalstar Europe Satellite Services Ltd lowers the Recommended Retail Price of the SPOT Satellite GPS Messenger™ and introduces the Recommend a Friend Rebate Programme**

**DUBLIN, IRELAND (24th September 2009)** - Globalstar Europe Satellite Services Ltd, a leading provider of mobile satellite voice and data services to businesses, governments and consumers, today announced that it has lowered the recommended retail price (RRP) of the SPOT Satellite GPS Messenger™ to €149.99 and will be introducing a rebate programme which rewards existing and new SPOT customers with €60.00 cash back.

As of 14<sup>th</sup> September 2009, the SPOT Satellite GPS Messenger™ can be purchased from recommended SPOT retail partners in selected European territories from RRP €149.99. This represents a €50 reduction on the original recommended retail price of €199.99. See [www.findmespot.eu](http://www.findmespot.eu) for a list of recommended SPOT retailers in these selected territories.

From 01<sup>st</sup> October to 31<sup>st</sup> December 2009, Globalstar Europe Satellite Services will be introducing the Recommend a Friend Rebate Programme. This Programme will enable existing customers to avail of €30 cash back when they recommend SPOT to their friend, who will also receive €30 for purchasing a SPOT with one year's Basic Service & Tracking. The Programme will be available from recommended SPOT retail partners in the UK, France, Spain, Italy, Germany & Norway from 01st October 2009. See [www.findmespot.eu](http://www.findmespot.eu) for a list of recommended SPOT retailers in these territories.

SPOT combines GPS location technologies with reliable commercial satellite messaging to communicate the user's location information and status to a pre-determined list of personal contacts with the push of a button. In an emergency the user can send an S.O.S./9-1-1 (European 112) alert notifying an international emergency rescue coordination center of their location and need for help from virtually anywhere in the world - including some of the most remote locations - independently of cellular networks. SPOT's tracking functionality sends and saves the user's location waypoints and allows their contacts to track their progress in real-time using Google Maps™.

SPOT is the world's first handheld satellite personal messaging and safety device that provides an unparalleled level of peace-of-mind for consumers who spend time in the outdoors or simply want to stay connected with family and friends while away from home.

Since its November 2007 introduction, the SPOT Satellite GPS Messenger™ has helped initiate over 350 rescues on land and at sea in 51 countries. SPOT users have also transmitted more than 12 million “peace-of-mind” and “track me” messages worldwide.
