

## fling

Fling is the first game controller for iPad - Thank you, Ten One!

With Fling you aren't just faster than your opponent. Thanks to Fling's precision and ease of use you are more relaxed and can truly enjoy the game!

Fling is especially suitable for games and Apps with a virtual joystick or digital pad. This opens a new world to users and developers are enthusiastic about the applications!

### Function

Fling fastens via two suction pads, just stick it to the right spot on screen and go!

The transparent design lets you see right through Fling onto the user interface on screen - when in use Fling simply gets out of your way.

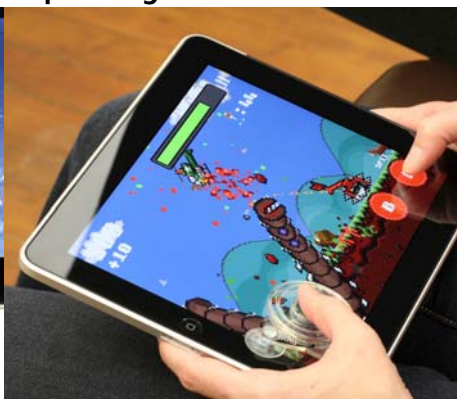

Fling is flexibly mounted and will automatically return to a centred position. Last but not least, Fling works well for right- and left-handers alike!
