FOR IMMEDIATE RELEASE

## **Mixvibes Cross DJ 3.0 for iOS & Android: Universal, redesigned.**

Cross DJ for iOS just got a new audio engine and a fresh new look but above all, it is now a universal app. Meanwhile, its Android counterpart now works with Android M.

### **Cross DJ for iOS**

#### **New audio engine**

Cross DJ for iOS audio engine has been re-engineered. From a user standpoint, this translates in significant improvement of the battery consumption, better audio quality and optimized recordings.

#### **A redesigned app**

Cross DJ for iOS has been redesigned to achieve a greater consistency across both platforms. It namely brings the following benefits:

- Change the color of each deck (7 colors: blue, orange, red, yellow, green, purple & pink).
- Portrait mode: switch the device orientation to access a single-player portrait view.
- Vinyls: choose between big & small covers.
- Notification when a loop, an FX, a sample or an EQ is active.
- Small buttons are easier to tap.

#### **Universal app**

Before, you could:

- buy Cross DJ for iPhone, and possibly run a stretched version of it on your iPad.
- buy Cross DJ for iPad to enjoy the iPad-only layout.

Now, you can simply buy Cross DJ once and use it on both your iPhone and your iPad while enjoying a specific layout for each device. And you are not charged twice for it.

### **Cross DJ for Android**

- Cross DJ now run smoothly on Android M devices.
- On those devices, MIDI control in Cross DJ is now plug and play. Supported controllers are U-Mix Control 1&2, U-Mix Control Pro 1&2, Pioneer DDJ-WeGO 2 & 3 & Pioneer DDJ-SB.
- Multichannel audio for devices running Android M, providing for dual-stereo output. Users now can now pre-cue in stereo, while having a stereo master output at the same time.
- Many bug fixes.

## **Pricing and availability**

iOS

- Cross DJ Pro: [appstore.com/crossdj](https://appstore.com/crossdj) (regular price: \$9.99/€9.99)
